**HIGHWAY - MARINE - RAIL**

# AN INDUSTRY LEADER, AS LONG AS THERE'S BEEN AN INDUSTRY.

Emmert International was founded by Terry Emmert, in Clackamas, Oregon, in 1968. As the company grew and expanded, we began designing and manufacturing our own heavy-haul and rigging equipment to meet the unique needs of our customers' projects.

Such configurations have helped us to consistently complete any job we are assigned, including the relocation of Howard Hughes' famous "Spruce Goose," the Hubble Telescope, the FermiLab g-2v Cryostat, the LACMA 340-ton Levitated Mass, the Odd Fellows Building in Salt Lake City, and the 3.2 million-pound Fairmont Hotel.

We also specialize in transporting equipment for the power, chemical, marine, mining and aerospace industries. We've partnered with industrial contractors, manufacturers, supplier and utility companies to transport equipment that powers our lives.

## OUR MISSION

Our mission is to continue to challenge conventional wisdom, push the boundaries of engineering technology, and continue to lead the heavy-haul industry. We will achieve this by taking on the biggest, heaviest, most complicated jobs in history and completing them more efficiently and safely than ever before.

## INNOVATION

State-of-the-art engineering, logistics, and transportation solutions for every job.

## EXCELLENCE

The industry's best trained, safest, world-class personnel.

## STEWARDSHIP

Fostering sustainable, long-term growth, and fulfilling career opportunities for every one of our employees.

## DEPENDABILITY

First-class, industry leading service, and a commitment to exceed expectations.

## ▶▶▶▶ RIGGING & HEAVY LIFT

We employ dedicated professionals who specialize in heavy lift and rigging with the knowledge and expertise to get the job done safely, on time, and on budget.

Our custom heavy lift systems are built specifically for the unique heavy lift demands of each project, engineered by Emmert International by in-house Emmert International engineers, to assure that each project is performed with the utmost safety. With state of the art 2D and 3D engineering models, Emmert International simulates complex and heavy lifts in a virtual world before the actual lift. Working hand in hand with our award-winning operations people, our engineers map and plan each step of the heavy lift process to make sure that each project is performed safely and on time.

# MARKETS

WE HAVE THE **PEOPLE AND EQUIPMENT** TO ACCOMMODATE THE MOST UNIQUE NEEDS

## POWER

We've been providing specialized transportation and rigging solutions to hundreds of power generating and distribution customers for decades.

Our unique team approach to your equipment transportation and installation needs is backed by our award-winning professionals, experienced in new, replacement, and shutdown operations. Whether its turbines, transformers, generators, steam drums, HRSG components, or boilers, we have the people and equipment to accommodate the most unique needs.

## MARINE

We have extensive experience moving cargo via barge including rolling cargo onto and off of barges and receiving cargo direct discharge from ship. For years Emmert has been transporting and launching private yachts, small ships, and commercial barges. We've worked with companies to provide innovative launch and recovery systems for marine vessels weighing several thousand tons.

## AEROSPACE

We provide consulting, operational support, and transportation services for a wide range of aerospace projects including the Hubble Space Telescope, The Boeing Company's Delta IV Rocket Program, and the relocation of the Howard Hughes HK1-Spruce Goose from Long Beach, California, to Oregon. Over the years Emmert International has also assisted aircraft manufacturers relocating assembly lines and tools.

## MINING & MINERALS

Emmert International's years of experience in the mining and minerals industry is attributed to our "can do" creative solutions for handling equipment in the largest configuration possible. Our ability to complete mega projects safely and successfully has saved valuable time and money during scheduled and emergency shutdowns, as well as standard installation projects.

## OIL, GAS, & CHEMICAL

Emmert International's success in providing services in the Oil, Gas, and Chemical markets is attributed to our field personnel's industry-wide reputation for exceptional planning and safe execution of projects in hazardous conditions. Our integrated manufacturer-to-rough-set approach has enabled us to move some of the largest equipment from supplier to foundation. Our dedicated and professional management, logistics personnel, and responsive safe crews have exceeded deadlines during the most critical equipment change-outs and shutdowns, earning significant savings for our customers and repeat business from some of the nation's largest OGC companies.
